Atmospheric Commercial Gas Water Heaters

Ideal for Large Residences, Small Restaurants, Apartment Buildings, Office Complexes, Dairy Barns, Salons, Barbershops and Many Other Facilities

ezFIT Features:
- 199,000 BTU/hr
- 90 gallon capacity
- Natural gas or propane burner
- 120°F to 180°F adjustable electronic thermostat
- Electronic ignition
- Automatic damper
- Water jet sediment reduction side inlet
- Clean out port
- Optional leg extension kit lifts water heater to NSF-5 standard
- Ecomate® insulation
- 26-inches wide

Turboflue® High Performance Heat Exchanger:
- Patented helical-fin multi-stage design
- Superior heat conduction and fuel efficiency

Made in the USA

Five-Year Limited Tank/Heat Exchanger Warranty
– THE INDUSTRY’S FINEST

Built like a Bock

For LP models change suffix “N” to “LP”
*LP Gas valve - .50 NPT

Working Pressure: 150 psi (1034 kPa)
Test Pressure: 300 psi (2068 kPa)

For natural gas: manifold pressure = 3.5” w.c. (0.87 kPa); Inlet pressure range = 5 - 14” w.c. (1.25-3.49 kPa)
For propane gas: manifold pressure = 10” w.c. (2.49 kPa); Inlet pressure range = 12 - 14” w.c. (2.99-3.49 kPa)
T&P valve factory installed

All Bock products meet or exceed current ASHRAE standards. These products are design certified by UL (Underwriters Laboratories) and meet ANSI Z21.10.3/CSA 4.3 requirements for operation up to 180°F (82°C). Approved for use as an automatic storage water heater.

Warning: Do not install on combustible flooring. Installation should be in accordance with all national and/or local codes. In the absence of local codes, refer to NFPA 54 or CSA B149.1.

Caution: The recommended maximum hot water temperature setting for normal residential use is 120°F (49°C). Bock recommends a tempering valve or anti-scald valve be installed and used according to the manufacturer’s directions to prevent scalding.
