Warning: Installation should be in accordance with all national and/or local codes. In the absence of local codes, refer to NFPA 54.

Caution: The recommended maximum hot water temperature setting for normal residential use is 120° F. Bock recommends a tempering valve or anti-scald valve be installed and used according to the manufacturer's directions to prevent scalding.

Pressures (all): Working Pressure, 150 psi; Testing Pressure, 300 psi
