Power Gas Water Heaters

• 140,100 to 623,000 BTU/hr
• 50 to 113 gallon capacities
• Glass-fused-to-steel water tank
• Dual magnesium anode rods to inhibit corrosion
• Barometric draft control furnished with all models
• Propane gas available on request
• Power gas burner with spark ignition, 100% safety shut-off

Turboflue® High Performance Heat Exchanger:
• Patented helical-fin multi-stage design
• Superior heat conduction and fuel efficiency

Made in the USA
No field conversion kits available.
Burner protrudes 12" - 14" from tank depending on make and model. Contact Bock for burner detail dimensions.

*Nipple not included
**Optional setting, contact factory

T&P valve and brass drain valve factory installed
Standard Voltage (all): 120V, 60 Hz, 1P
Working Pressure: 150 psi (1034 kPa); Test Pressure: 300 psi (2068 kPa)
All Bock products meet or exceed current ASHRAE standards.

Warning: Do not install on combustible flooring. Installation should be in accordance with all national and/or local codes. In the absence of local codes, refer to NFPA 54.

Caution: The recommended maximum hot water temperature setting for normal residential use is 120°F. Bock recommends a tempering valve or anti-scald valve be installed and used according to the manufacturer's directions to prevent scalding.
